

"There is no greater wealth than peace of mind."

The safety of our guests, family and friends is paramount and COVID-19 has dramatically changed the way we do things, including how we relax and vacation.

To ensure our guests can vacation with confidence, we have partnered with ECO-SAFE Services who offer a comprehensive viral mitigation service to disinfect your rental property prior to arrival, providing a safer and healthier environment. ECO-Safe uses the same Victory

ECO-SAFE uses a comprehensive electro-static spraying process using an EPA registered disinfectant shown to kill a wide range of pathogens, including COVID-19 (*reference EPA List "N"*) – helping to keep your vacation home virus and bacteria free. The vaporized hydrogen peroxide based disinfectant works within seconds. Once the decontamination process is complete, the hydrogen peroxide denatures and disseminates into oxygen and water within minutes, leaving no residue or by-products.

Our team of professionals will enter the unit after the cleaners, so that all commonly used surfaces including; doorknobs, handles, cabinets, railings, tables, countertops, furniture, light switches, toilets and more are virus and bacteria free. Upon arrival, guests can safely enter the building with the peace of mind that they deserve.

IMPORTANT - These services are in ADDITION to the comprehensive cleaning services provided by the property management company.

Please contact your Property Manager for pricing and scheduling. Due to demand, we kindly ask that you schedule as soon as possible.

DISCLAIMER

This service is performed using guidance from the CDC, using solutions and delivery processes approved by the EPA, and as instructed by equipment and disinfectant manufacturers. However, nobody can guarantee effectiveness, or make claims for final results. Consumers requesting this service agree to hold Eco-Safe Services harmless of any damages or claims.
